**SOURCE**

The power plant is fenced-off in the southern section of the GORKI (44°02'E/56°19'N) Molotov Motor Vehicle Plant, Gorki Oblast, south of the large foundry and forge, directly west of a large M-S factory road.

a. The power plant consisted of two boiler houses and a transformer house, each about 150x60x60 feet. Two flue boilers, about 30x15x25 feet each, and two turbines of British make with generators were in the second boiler-house. A third boiler and a third turbine with an AEG generator were set up by 15 September 1948. According to Soviets, the latter installations were to be put into operation on 1 November 1948.

b. A fellow PW said that four boilers and four turbines with generators were in operation in the other boiler-house.

c. There were four metal smokestacks on each boilerhouse and one about 660-foot smokestack south of the second boilerhouse. The boilerhouses were interconnected by a gangway, at an altitude of 30 feet.

Thirty Soviets working in each of the two shifts in the second boilerhouse, and 30 U's fitting the boilers.

Second boilerhouse: Two old generators with 16,000 kva. each  
One new generator with 18,000 kva.

Other boilerhouse: Four generators with a total of 60,000 kwh.

For plant layout see annex.

25X1   Comment:

a. The report contains important information on the capacity of the turbines and the dimensions of the buildings. The data on the buildings are considered possible compared with the aerial photograph No. C11 taken on 2 September 1942 but confirmation is still required.

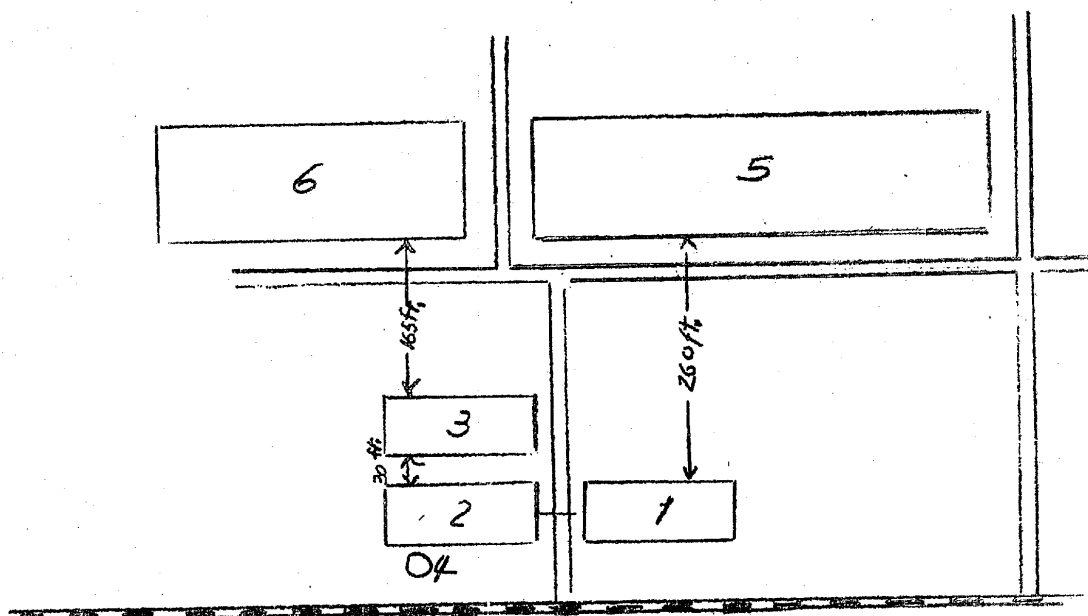

b. The automobile plant and the power plant have been repeatedly reported.

1 Annex: Power plant of the GOMI Polotov Motor Vehicle plant.
